## **Purpose**

The purpose of this evaluation is to provide a basis for improving the quality of physical education programs in Grades K – 12 in Illinois. The criteria reflect standards established by the physical education profession and the Illinois State Board of Education. The evaluative checklist is provided as a service by the Illinois Association for Health, Physical Education, Recreation and Dance (IAHPERD) to stimulate self-study and self-evaluation in order to ascertain the strengths and weaknesses of physical education programs.

## **SUGGESTED PROCEDURES FOR USING THE CRITERIA FOR EVALUATING PHYSICAL EDUCATION**

**Administration.** Initiation of an evaluation is the prerogative of the local school instructor and/or administrators. Grade five is included in both the K-5 and the 5-8 Evaluative Criteria. This overlap is provided to accommodate alternative school district grade level organization. The evaluation will be confidential but may, with School District approval, be used for research purposes by the IAHPERD.

**Recording and Evaluation.** Each of the statements should be checked according to the following rubric:

1. No effort or evidence present to support the criteria at this time.
2. Minimum effort or evidence to support quality physical education criteria in curriculum, instruction, facilities and equipment, medical and safety and administration. The program is minimally aligned to state and national standards.
3. Adequate effort or evidence to support quality physical education criteria in curriculum, instruction, facilities and equipment, medical and safety and administration. The program is aligned to state and national standards.
4. Exemplary effort or evidence to support high quality physical education criteria in curriculum, instruction, facilities and equipment, medical and safety and administration. The program is based on state and national standards.

State Learning Standards and Descriptors are available on the Illinois State Board of Education Website.

Information regarding the New Enhanced Physical Education Programs is available on the IAHPHERD website in the resource section.

National standards are available in the document [Moving to the Future: National Standards for Physical Education](#). This is a published by NASPE.

Use the supporting evidence section to provide any clarifying information, including explanations for rating. Paper documentation providing support or explanation MUST be available to evaluators during site visit.

### **FOLLOW-UP ACTION:**

Upon completion of the checklist, the evaluator should identify and summarize the strengths and weaknesses, by section.
